WHAT ARE THE NEIGHBOURS DOING?

Strategic Disability Policy in the Nordic region

Nordic Centre for Welfare and Social Issues
STRATEGIC DISABILITY POLICY

THE NORDIC COUNTRIES as well as Faroe Islands, Greenland and Åland are working on inclusion of and participation for persons with disabilities - in similar, yet different, way. The strategic work for increased participation and an inclusive society is also linked to the UN Convention on the Rights of Persons with Disabilities. The work within the field is sufficiently similar that it is possible to draw lessons from the work being done in neighbouring countries, yet so different that it is also possible to obtain new perspectives on one’s own country’s policy and strategy. This makes it exciting to see what the neighbours are doing.

Throughout 2016, evaluations of current strategies are underway in several parts of the Nordic region. At the same time intensive efforts are being made in the design of future strategies and/or action plans for disability policy. In co-operation between the Council of Nordic Cooperation on Disability, National Institute for Health and Welfare (THL), the Finnish National Council on Disability (VANE) and Vammaisfoorumi/Disability Forum, the seminar “Disability Policies and the Impact of the UNCRPD in the Nordic Region” is being organised. The seminar will be held in Helsinki 9-10 March 2016 and is an activity within the Finnish Presidency of the Nordic Council of Ministers.

The Nordic Centre for Welfare and Social Issues has also previously worked with the theme of disability policy strategies in the Nordic region. This occurs via, among other things, the project Disability Policies in the Nordic countries (2012-2013), as well as via administering a network concerning disability policy coordination (2011-2012) and the booklet on the subject matter of Nordic Disability Policy (2010).

Nordic Council of Ministers and the Nordic Council

The Nordic Council of Ministers is the Nordic governments’ official cooperation body. The Ministers for Co-operation (MR-SAM) coordinate the overall work. There is also a Council of Ministers for ten different policy areas. The Nordic Council is the official cooperation body for the parliaments of the Nordic countries.

The Nordic Centre for Welfare and Social Issues

The Nordic Centre for Welfare and Social Issues (NVC) is an institution under the Nordic Council of Ministers for Social Affairs and Health. NVC is working with the relevant social welfare issues within social welfare politics, disabilities, labour inclusion, alcohol and drug issues, and social welfare technology. This is accomplished by developing concrete proposals which are then presented to politicians and public officials, compiling research findings as well as organising Nordic and international conferences.

The Council of Nordic Cooperation on Disability

The Council of Nordic Cooperation on Disability is an advisory body to the Nordic Council of Ministers. The Council consists of sixteen members from all five Nordic countries as well as Åland, Greenland and the Faroe Islands. One-half of them are appointed by their national governments and the other half by disability organisations at the national level. The Council’s mandate runs until June 2017. The Secretariat for the Disabilities Council is part of the Nordic Centre for Welfare and Social Issues.
An important principle of disability politics is that persons with disabilities and their representative organizations are being involved in the processes and decisions that affect them. Consultation with authorities and municipalities, both structured and ad hoc, occur to varying degrees but in a similar manner throughout the Nordic countries. The text below focuses on the basic facts of the strategic work at the national level.

**DENMARK**

**National strategy or action plan:** “Disability Policy Action Plan 2013 - A society for all”

**Primary areas:** Citizenship and Participation, Education, Employment, Increased knowledge and more effectivity, Context and quality, and Innovative solutions, new technology and increased availability.
